Subject: MICROSOFT SETTLEMENT

Department of Justice:

It is high time that this case be closed and allow Microsoft to continue their innovative process's in developing new, improved, and affordable software programs that benefits individual consumers, the software industry, and the American Economy. Please stop spending taxpayers dollars on this case and devote your efforts to other more important matters that effect all Americans.

If the few special interests individuals would spend the resources in improving their software products instead of litigation, maybe they too could improve the efficiency of their products.

THOMAS J. SIMON
